

Carbon Reduction Plan – Veritas Imagery Services Ltd

Commitment to achieving Net Zero

Veritas Imagery Services Ltd is committed to achieving Net Zero emissions by 31/12/2031

Supplier name: Veritas Imagery Services Ltd. Publication date: 05/10/26.

Baseline emissions footprint

Baseline year: 1 March 2025 – 28 February 2026 (Veritas's financial year). This is Veritas's first Carbon Reduction Plan, so the baseline year and current reporting year are the same; future reductions are measured against it.

Veritas is a small company with no office; all staff work from home. It operates no company vehicles, owns no buildings and has no on-site fuel combustion. Satellite data is accessed and processed through third-party cloud platforms.

Emissions	Total (tCO ₂ e)
Scope 1	0
Scope 2	0
Scope 3 (included sources)	1.01
Total emissions	1.01

Scope 3 includes upstream transportation and distribution, waste generated in operations, business travel, employee commuting and downstream transportation and distribution. Business travel (car and rail) is the only material source, at 1.01 tCO₂e. Upstream and downstream transportation are nil, as no physical goods are transported and all products are delivered digitally. Employee commuting is nil, as all staff work from home. Waste generated in operations is negligible. Scope 2 is nil, as Veritas has no office and purchases no electricity of its own. Emissions are calculated using the government (DESNZ) conversion factors for greenhouse gas company reporting.

Current emissions reporting

Reporting year: 1 March 2025 – 28 February 2026 (same as the baseline year, as this is our first plan).

Emissions	Total (tCO ₂ e)
Scope 1	0
Scope 2	0
Scope 3 (included sources)	1.01
Total emissions	1.01

Emissions reduction targets

Veritas will reduce total emissions from 1.01 tCO₂e in the baseline year to 0.86 tCO₂e by February 2031, a reduction of around 15%. This is driven by a 20% reduction in business mileage, which accounts for 96% of our footprint, with the trips replaced by rail or remote meetings.

To stay on a path to Net Zero, we have adopted the following targets:

- Encourage all home-based staff to use renewable electricity tariffs by 2030.
- Reduce business mileage in personal vehicles by 20% by February 2031, by using rail and remote client meetings where practical.
- Select cloud processing and data hosting providers with published renewable energy or net zero commitments for new contracts.

Progress against these targets will be reviewed annually by the company's sole director and this plan updated.

Carbon reduction projects

Completed initiatives

The following measures are already in place and will be maintained during the contract:

- Fully home-based working, which avoids commuting and office energy use.
- Digital delivery of all imagery and analytics products, with no physical goods shipped.
- Paperless invoicing and document management.

Future initiatives

In the future we hope to implement further measures, such as:

- Moving to renewable electricity tariffs for all workspaces.
- A travel policy favouring rail and virtual meetings where possible.
- Including carbon and energy criteria when selecting cloud, data and imagery suppliers.
- Measuring and reporting emissions annually using the GHG Reporting Protocol.

Declaration and sign-off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and the associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard, and use the appropriate Government emission conversion factors for greenhouse gas company reporting. Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions has been reported in accordance with the published reporting standard and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the company's sole director, who acts as the board and the equivalent of an audit committee.

Signed on behalf of the supplier: Paul Majmader, Director

A handwritten signature in blue ink, appearing to read "Paul Majmader". The signature is stylized with a large, looping initial "P" and a cursive "Majmader".
